Patent No. 5972616
GENERAL INFORMATION:
APPLICANT: O'Brien, Timothy J.
APPLICANT: Tanimoto, Hirotoshi
TITLE OF INVENTION: TADG-15: An Extracellular Serine Protease Overexpressed
TITLE OF INVENTION: Breast and Ovarian Carcinomas
FILE REFERENCE: D6064
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  OTHER INFORMATION: Amino OTHER INFORMATION: 23 to Patent No. 5972616

Patent No. 6649741

GENERAL INFORMATION:

APPLICANT: O'Brien, Timothy J.

APPLICANT: Tanimoto, Hirotoshi
TITLE OF INVENTION: TADG-15: An Extracellular Serine Protease
TITLE OF INVENTION: Overexpressed in Carcinomas
FILE REFERENCE: D6064CIP/D

CURRENT APPLICATION NUMBER: US/09/654,600A

CURRENT FILING DATE: 2000-09-01
                                                                                                                              Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       540
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        480
                                                                                                60
Sequence 10, Application US/09644600

Patent No. 6451500

Patent No. 6451500

GENERAL INFORMATION:

APPLICANT: O'Brien, Timothy J.

APPLICANT: Tanimoto, Hirotoshi

ITITLE OF INVENTION: TADG-15: An Extracellular Serine Pro
ITITLE OF INVENTION: TADG-15: An Extracellular Serine Pro
CURRENT APPLICATION NUMBER: US/09/644,600

CURRENT APPLICATION NUMBER: US/09/644,600

CURRENT FILING DATE: 2000-08-23

PRIOR APPLICATION NUMBER: 09/421,213

PRIOR APPLICATION NUMBER: 09/27,337

PRIOR APPLICATION NUMBER: 09/027,337

PRIOR APPLICATION NUMBER: 09/027,337
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                S
                                                                                                                                                                                                                                                                       RESULT 4

Sequence 10, Application US/09654600A

Patent No. 6649741

GENERAL INFORMATION:
APPLICANT: O'Brien, Timothy J.
APPLICANT: Tanimoto, Hirotoshi
TITLE OF INVENTION: TADG-15: An Extracellular Serine Protease
TITLE OF INVENTION: Overexpressed in Carcinomas
FILE REFERENCE: D6064CIP/D
CURRENT APPLICATION NUMBER: US/09/654,600A
CURRENT FILING DATE: 2000-09-01
PRIOR APPLICATION NUMBER: 09/421,213
